

Dear families, parents, caregivers and children!

Welcome to Germany!

We, the project team of Vielfarb Social gGmbH, want to make it easier for you to arrive in Berlin. In Germany, you have the option of providing good care for your child at the age of about 1 year until school enrollment, by trained specialist staff – in a day care center for kindergarten (kindergarten). We would like to show you this opportunity, you win your child this chance to make and at the same time supportive that your child can laugh and play age appropriate, quickly learn the German language and make new friends. At daycare, your child is well prepared for the transition to school.

For this we develop different projects for you on different levels and implement them in various offers. We offer, among others:

- education and information about the daycare, the health care system for children, healthy eating, the neighborhood and much more
- Educational offers for children and their families, if no daycare place currently available

We help you with questions about your child!
